

THE FUTURE OF MARINE STABILIZATION

LIQUID COOLING

The liquid cooling system dissipates heat generated by the motor and spinning bearings while also cooling the inverter and hydraulic manifold.

VACUUM ENCLOSURE

The sealed vacuum flywheel enclosure minimizes air drag to increase performance and reduce heat and power consumption.

CONTROL ELECTRONICS

The gyro control module uses motion sensors and an Inertial Measuring Unit (IMU) to monitor and process real-time boat behavior data.

BRAKING SYSTEM

The pressurized, closed loop braking system dynamically controls the gyro using hydraulic cylinders and proportional valve.

MODULAR DESIGN

The Smartgyro unit can be serviced, maintained and assembled directly inside the boat.

An unprecedented balance of performance and efficiency.

Vessels 80-95'

ELEVATING EVERY MOMENT

Nothing compares to the feeling of being on the water. Stepping aboard means leaving land—and the ordinary—behind. Ahead lies freedom, adventure, relaxation and experiences that come only from a life well lived.

Our love for boating comes alive in our products. We push the limits of echnology so boaters can enjoy a life without limits. Smartgyro stabilizers liminate boat roll to make life's richest moments more comfortable, afe and satisfying.

BACKED BY A GLOBAL LEADER

Smartgyro is part of YANMAR.

YANMAR is a privately-held, multinational company headquartered in Osaka, Japan.

THE WATER IS NO PLACE FOR COMPROMISE

SMARTGYRO MAXIMIZES PERFORMANCE, EFFICIENCY, AND BOAT ROLL REDUCTION IN ALL SEA CONDITIONS. OUR COMPETITORS WOULD STOP THERE, BUT WE REFUSE TO SETTLE.

We believe the ultimate luxury is uninterrupted time on the water. That's why Smartgyro is designed to minimize not only unwanted movement but also downtime during maintenance. Most gyros must be uninstalled and shipped back to the factory, but Smartgyro can be serviced directly onboard the vessel. Because patience is overrated.

POWERFUL PERFORMANCE

Advanced technology virtually eliminates Stabilizers can be fully serviced onboard boat roll, no matter the conditions.

SUPERIOR EFFICIENCY

for significant time and cost savings.

LESS DOWNTIME

Faster maintenance means more time to enjoy your favorite things in life.

When passion meets innovatioi the possibilities are endless.

WE DON'T JUST MAKE INSTALLATION POSSIBLE. WE MAKE IT EASY.

WHETHER REFITTING A CLASSIC CRUISER OR BUILDING A MODERN YACHT, SMARTGYRO'S UNIQUE MODULAR CONSTRUCTION MAKES THE PROCESS SEAMLESS.

By designing a unit that can be fully disassembled, Smartgyro has created new installation opportunities in vessels with small access spaces.

EXISTING BOATS

The base frame can be broken down into four parts to allow for installation through narrow access hatches, making refitting easier and more cost-efficient.

NEW BOATS

The unit's compact dimensions allow boat builders to easily integrate Smartgyro into vessel design, including taking advantage of empty hull space.
